Specimen Integrity Revision #3.docx;

I approve of the attached version. I made a couple of grammatical error revisions, so please use this version for any additional changes.

Lynne or Karin- what is the "current version" of the AABB Technical Manual? It will need to be added.

Thanks Becky for all your work on this policy!

**Subject:** RE: Specimen Integrity Revisions

Hello everyone. I will be presenting the newly revised Specimen Integrity policy at the PPPPC meeting on June 18th. I have attached a copy of the revised policy. I would like to confirm your approvals for the policy changes. Please send me an email with your approval for the revised policy

by Monday, June 16th.

I'm looking forward to the decrease in the amount of specimen errors that are going to occur once the new policy has rolled out!

Thanks so very much.

Becky
